a
Standard nulls fail
joint spatial surrogates, tissue classes differ
.120
class-stratified surrogates
.048
coexpression-matched gene null, coherent sets
.210
same, brain background
.442
fourth-corner max test
.019
0
.05
.25
.5
worst false-alarm rate, planted negatives
(dashes = nominal level)
b
Calibration costs power
map-side leg alone
max test
catch rate, strong gene-set signal
1.0
0.5
0.0
